schotten & hansen

Leading wood specialist Schotten & Hansen works in harmony with nature to create customized products for people who value aesthetics and a healthy living environment.

The company was built around Torben Hansen's knowledge about trees and his passion for wood. He has developed and patented processes and products that prepare the wood to last longer than a human lifetime. Whether it's long floorboards or prefabricated elements for airport and hotel lounges, huge yachts, or luxury homes. In every project, Schotten & Hansen's goal is to use their products to enhance and preserve the individuality of each space.

Nature is an inexhaustible source of inspiration for the company to get a true understanding of wood and its maturation processes. The pigments used to color the wood also come from nature, whether oxidized metals, ground stones, or plants. Oils and waxes add further natural protective layers.

With a degree in forestry, CEO Bernhard Heinloth is since 2015 in charge of operations and sales. He ensures that traditional craftsmanship, combined with modern technology, provide a long-lasting, beautiful patina on the wood products.

Brand

Nature refined. Creators of wooden surfaces, interior, and flooring solutions.

Established

1984

slanted—bavaria

→ CEO Torben Hansen has found unique ways to translate the healing effect of trees into architecture.

→ Traditional craftsmanship is at the heart of the workshop. This is the only way to respond to the particular characteristics of the wood.

→ Natural pigments, extremely finely ground, penetrate deep into the wood pores and create harmonious colour tones.

→ *Magnum House Hong Kong*, Architect BTR Hong Kong, long board, steps, doors, and walls in oak, customized color.
