Eucalyptus Sense

sensory, powerful & elegant

The branches of the eucalyptus tree decorate festivities around the world. Known for its auspicious qualities like strength, protection and wealth, the fast-growing wood provides a lasting, feel-good atmosphere to interiors. Easy on the eye, our naturally dried surface treatment brings out the wavy details of the grain tangibly. Relaxation guaranteed.

As the tree grows, the bark naturally separates from the trunk, revealing the colourful surface beneath. Observe the reddish hue of the heartwood as it shimmers through slightly in our three colour characters: the light character is tactful and reserved, the medium character subtle and sophisticated, while the dark character radiates strength.
